ABOUT US

Evolved within the niche industry of **examinations**, Vensysco has not only emerged as one of the largest exam infrastructure service providers in the country, but in addition, we are solving varied business concerns as a **multi-product** and **multi-services company**. Although we have been instrumental in shaping the online exam industry from scratch since 2009, Vensysco was formally founded in the year 2016 with a vision to successfully deliver high-stake examination projects through the perfect blend of ground-breaking technologies and unwavering human dedication. Besides having the largest network of centers across India and abroad, we are the leading exam security service providers including **CCTV surveillance with Live Streaming/Webcasting capabilities, Biometrics, QP migration, GPS-enabled Logistics, Security Guards with HHMD, Technical and Non-Technical Manpower, Mobile Jammers, and Travel Support** among others.

Having set a benchmark of unparalleled delivery in the highly confidential and sensitive exam industry, we are delivering robust business solutions in the areas of **Cyber Security, Digitalization, Technology and Science, System Integration, Geo-Informatics, 360° Marketing, and Skill Development**. Headquartered in Noida, India, our reach extends across the nation with offices strategically positioned across the country to cater to the diverse needs of our esteemed clientele.

The bones in our body form our skeleton. They help to support our body and protect important organs. Bones also store nutrients and minerals, and they are places where blood cells are made. Humans have more than 200 bones in their bodies-all of different shapes and sizes. Like other parts of our body bones keep changing all the time. They are alive and grow, especially when you are young. The outer surface of a bone is called the periosteum. It is a very thin membrane that has nerves and blood vessels in it. They carry nutrients to the bones. The compact bone is the smooth and very hard part of the bone. It is the part you see when you look at a skeleton. Spongy bone is lighter than compact bone but it is still very strong. It looks like a sponge or honeycomb with a lot of spaces in between. The inside parts of a bone are hollow. They are filled with a jelly called bone marrow. In adults the long bones of the legs and arms are filled with yellow marrow. The ends have red marrow. It is the place where billions of new blood cells are produced every day. When a child is born it has about 300 "soft" bones . As it grows up some of these bones grow together to form the 206 bones that a normal grown-up has. During childhood bones grow with the help of calcium. By the time you are about 20, bones stop growing. The spine is a special part of our skeleton. It has 26 small bones that look like rings and are linked together. These rings are called vertebrae. The spine lets you twist and bend your body and it holds your body upright. It also supports your head so that it can't fall down. The spine protects the spinal cords which are the nerves that send information to the rest of your body. Between each ring there are small soft discs. They keep the vertebrae from rubbing against each other and act as a pillow, so when you jump into the air and come to the ground again it doesn't hurt. Ribs are a cage of bones that protect the most important organs: your heart, lungs, liver and others. You can feel your ribs by touching your chest. Most people have twelve pairs of ribs that look the same on the right and left side. They are attached to the spine in the back. In the centre of your chest there is a strong bone called the sternum. It keeps your ribs in place, so that they don't fall apart. The bones in your head make up your skull.

the bones in our body form our skeleton. they help to support our body and protect

SUBMIT EXAM

QP MANAGEMENT

It is a full-fledged question paper creating solutions with all the features that you need to get your question paper with multi-disciplinary, Layered DifficultLevels ,Analytical Question bank and Supports all type of Question with highly secure and easily accessible interface.

-  Questions in Multiple Languages
-  Fill in the Blanks
-  Match The Following
-  Multi Select Type questions
-  Multiple Type Questions
-  Paragraph based questions
-  Descriptive Questions
-  Coding Questions

ON SCREEN MARKING

On-screen Marking (OSM) is a system that offers institutes an extensive platform for assessing pen and paper-based exams on computer screens. It completely automates the entire marking and scoring system of descriptive answers in a simplified, accurate, and efficient process.

EXAM SECURITY SOLUTIONS

CCTV

TEMP CCTV

The logbook of physical activities, capturing and recording every moment.

LIVE CCTV

The modern way of real-time surveillance. The live streaming acts as the eyes of the decision makers helping them understand issues visually and take rightful actions.

AI BASED CCTV

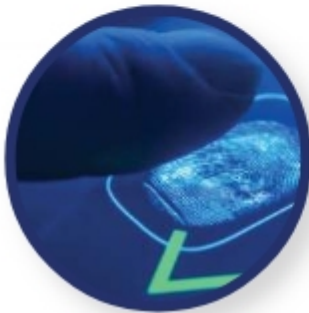

The most advanced surveillance system that helps track people and objects across the reach of cameras.

BODY CAMERA

Industry First Large Scale Installation of Body Cameras including Audio Recording

BIOMETRIC

FINGER PRINT SCAN

Each person has a unique fingerprint, which is utilized worldwide as a basic biometric measure. It is most used around the world and is dependable as a safety measure against impersonation.

FACIAL SCAN

This biometric measure detects the facial features of a candidate and can be utilized from a distance. It is more accurate at identifying people and can see through features like facial hair, makeup, and others that are meant to deceive the system.

IRIS SCAN

Patterns of an iris remain the same throughout the life of a person, making it quite dependable as a long-term security measure. It also ensures accurate identification for those with significant changes to facial features.

FRISKING

HHMD (HAND HELD METAL DETECTOR)

Hand-held metal detectors are used by us to detect the presence of restricted metallic objects with candidates. It helps to conduct safe and secure examinations.

DFMD (DOOR FRAME METAL DETECTOR)

A Door Frame Metal Detector (DFMD) is a metal detector fitted in a door to detect metal carried by candidates that may be hidden on the body of the candidates.

EXAM STATIONARY & LOGISTIC

QP LOGISTIC

We ensure the successful logistics of QP which is one of the most confidential and sensitive parts of Offline Exams.

STATIONARY SUPPLY AND LOGISTICS

We provide small yet important items like paper, pen, pencil, gluestick, tape and stapler for smooth conduction of exam. We provide logistics of important documents like attendance sheets, declarations, sign-offs of manpower, candidate credentials if any, and other documents as per client requirements.

GPS ENABLED LOCK

One of the most advanced locking systems for QP logistics with RFID and SMS-enabled keys.

EXAM SUPPORT **MANPOWER**

TECHNICAL MANPOWER

To manage and troubleshoot IT hardware, software, and networking related concerns pertaining to Online Centers, biometrics, CCTV, and other technical works.

NON-TECHNICAL MANPOWER

Like Examination Incharge, Invigilators, Observers, Frisking Staff, and Security Guards among others.

RESOURCE VERIFICATION

We verify important indicators of manpower like their qualification, experience, readiness, competency, and clean history.

SECURITY

SURVEILLANCE

Creation of Control Command Center, CCTV installations, Video Analytics, Identity Tracking Management, etc.

CYBER SECURITY

Penetration Testing, Attack Simulation, Cyber Forensics, etc.

CROWD MANAGEMENT

Barricading, Bouncers, Security, Crowded Event Planning, and related infrastructure

PARKING

Boom Barriers, Automatic Ticketing Solutions, Vehicle Tracking System, etc.

DIGITAL TRANSFORMATION

DATA CENTRE

Setting up state-of-the-art Data Centers, Both Modular & Non-Modular capabilities, Green Data Centers, and both IT and Non-IT installation capabilities.

NLP

Natural Language Processing capabilities to solve your custom business needs.

AI-CHATBOT

Customized AI-based Chatbot solutions for your specific needs.

SMART CLASSROOMS

Converting traditional classrooms into modern IT-based classrooms with a complete range of IT hardware solutions and content management.

NETWORKING & SWITCHING / ROUTING

TECH & SCIENCE

SYSTEM INTEGRATION

One-stop System Integration solutions with IT, Non-IT, multi-product, and multi-services capabilities to solve your complex business requirements across:
